

# THE POWER OF COOPERATIVE SOLUTIONS™

## PROXY TECHNOLOGIES LAUNCHES PROTEUS SOFTWARE FOR UNMANNED SYSTEMS

**Washington, DC, August 12, 2013**—Proxy Technologies Inc. (Booth #1846) will unveil its PROTEUS™ (PROxy TEchnologies Unmanned Software) here this week during AUVSI's Unmanned Systems 2013 show. The PROTEUS™ software, part of its Universal Distributed Management System, provides the ability to command, control and manage multiple cooperating heterogeneous vehicles from a single Ground Control Station (GCS). Importantly, the PROTEUS™ solution has the capability to operate within multiple domains and can be adapted to air, land and sea platforms.

Using the company's SkyRaider® Optionally Piloted Vehicle (OPV) as its flight test platform, Proxy has been testing and implementing its Proxy Autonomous Control Systems (PACS™) product enabling a pilot to instantaneously operate the aircraft autonomously.

"Proxy is poised to offer companies a number of leading software and hardware solutions that will provide cooperative control of autonomous vehicles," said Bob Davis, CEO and President of Proxy Technologies Inc. "We are interested in partnering with large aerospace firms and aircraft leasing companies to begin converting their existing fleets of commercial aircraft to optionally piloted vehicles using our PACS™ product. Proxy has converted four aircraft to date using the PACS™ product," added Davis.

Key benefits of PROTEUS™ are:

- Fewer resources to manage multiple vehicles supporting group missions
- More precise vehicle control than is possible with human operators
- Error reduction
- Data sharing among multiple payload operators

### **About Proxy Technologies, Inc.**

Proxy is a pioneer in optionally piloted vehicles (OPV) and multi-aircraft Cooperative Flight control systems. Utilizing Proxy's PROTEUS™ software and the Proxy Automated Control Suite (PACS™), Proxy Technology solutions can be adapted to a wide range of existing piloted aircraft and Unmanned Vehicle platforms allowing a single mission commander to manage multiple vehicles simultaneously. Proxy has also developed and deployed the SkyRaider® OPV platform as an advanced heavy payload unmanned aircraft. Proxy was incorporated in 2005.
